OBJECTIVE

Applying for a front-end developer (React.js, next.js) job position where my experiences may be utilized and strengthen my team work collaboration.

EDUCATION

Master of Science in Petroleum Engineering (major in Production)| Sharif University of Technology (SUT), Tehran, Iran, 2017 – 2019
- **GPA: 17.69 out of 20_ Rank No. 1**

Bachelor of Science in Petroleum Engineering (major in Drilling)| Petroleum University of Technology (PUT), Ahvaz, Iran, 2013-2017.
- **GPA: 18.67 out of 20_ Rank No. 1**

PROFESSIONAL EXPERIENCE

- **Freelancer front-end developer**
  - I've been working for 2 years as a freelancer frontend developer in foreign website including fiverr.com and upwork.com.
- **Mid-level front-end developer**
  - I've recently joined Decooj startup as a next.js developer. Decooj is an online shop focusing on furniture and related products. Any merchant can build their own store to sell his products and order all the thing he wants to buy, as well.
- **Mid-level front-end developer**
  - Calaq group are mainly focusing on analysis daily news from any sources such as Telegram, Twitter on stock market fluctuations.
    As front-end developer in this team, my responsibility is developing UI platform using React and next.js to optimise the efficiency and boost performance of AI develop
- Front-end and Backend Developer of fronthooks.ir
  - **Fronthooks** is an online academy, focusing on providing online Front-end courses. I've developed the front-end and back-end using Next.js and node.js-Express, respectively.

- **Expert in HTML and CSS**
  - Implement HTML and CSS to creating initial layout, considering responsive web design scenarios.
- **Bootstrap, Tailwind and Materialize framework**
  - Utilizing each one of these framework to improve the efficiency of user interface styles.
- **Sass Preprocessor**
- **Expert in git and remote git repositories (Gitlab, GitHub)**
  - Utilizing the git flow procedure including (branching, pull, push, standard commit) to better manage the project and code review.
- **React.js Library (Advanced Level)**
  - Creating super-fast single page application using react.js library, with reusable, maintainable and manageable Functional components.
- **React Hooks and component lifecycle**
  - Utilizing React Hooks with Functional component to get rid of redundancy and increasing the efficiency and clean code standards.
  - Mostly used ones are useState, useEffect, and useContext.
- **Next.js Framework (Advanced Level)**
  - I use next.js in the case of projects when the SEO purposes, server-side render gets more important.
- **Expert in material-ui library**
  - Implementing all the UI components of material-ui with high level of customization to match your UI design
- **Call the server and working with API**
  - Call the server with all the type of APIs to send request, analyze response and handle all errors in the efficient way to display on the client-side.
  - Postman: Expert in working with postman to test and utilize the server-side APIs.
  - Implementing the Authentication and authorization process, verify or redirect the user in some protected Routes.
  - Good knowledge of working with query string and dynamic or tatic navigation (routing) of user between pages.
- **Formik Library**
  - As all the applications required authentication and authorization, getting data from user, validate, handle and send data to the server; the formic library is the most powerfull library to handle all these requirements.
- **npm**
  - Taking advantage of node package manager in react.js / next.js projects to implement famous react libraries. Some of them includes react-select, react drop-zone, react-datePicker and etc.

ACTIVITIES
